

NEW – Claims Processing Integration with Claim.MD Clearing House

1. Seamless Integration of 837 (claim) and 835 (ERA) with TIMS.
2. Customer required to establish account with Claim.MD.
3. Monthly flat integration charge from TIMS Audiology.
4. Monthly claims processing charge from Claim.MD based upon claim and remittance volume.

NEW – Improved Patient Reports Designer

1. Simplified report design and creation. Greater control over placement of text/images.
2. Audiograms, logos, and signatures can be viewed as their actual size in design mode.
3. Merge/view reports in the design screen.
4. Review of report settings – Editable at launch feature.
5. Track changes - When a report is saved as “Editable at launch”.
6. Track changes can be turned on when the report is run to allow draft editing functionality. Essential for university teaching environments.
7. Improved voice to text controls.

NEW – CareCredit™ Financing

1. CareCredit financing applications and transactions can be processed directly from TIMS, either through the Financing icon on the Patient Summary panel, or in a POS document.

Reports

1. Stock and custom reports can now be set as “Favorites” from the TIMS Reports menu, with a simple right click add to favorites.
2. Added home link for favorite reports.
3. Patient Accounts Receivable data can now be generated on the TIMS Reports screen.
4. Eliminating a separate Accounts Receivable link.
5. Current A/R date can now be seen at the top of the report’s menu.

Appointment Notifications

1. Automated confirmations and verifications.
2. Select how many days in advance to send the notifications.
3. Choose type according to patient preference - e-mail, SMS, or voice.
4. Filter by site, provider, and/or appointment type.

Appointments

1. Appointments have been redesigned for increased performance and better speed.
2. Resources tab in the appointment screen can be turned off if not used.
3. Updated web technology to view patient appointments from a standard web browser.

Communications

1. Merge/view letters in the design screen.
2. Communication letters can now be designed and used as patient intake sheets.
3. Letters can be run in bulk for a date range or individually per patient.
4. Customized intake sheets can be linked to the TIMS Intake Sheet button in the appointment summary area.
5. Print with one click auto-filled intake sheets.

Hearing Aid History

1. Components can now be copied to the other side of a binaural hearing aid history.
