

BULK GAS MANAGER

TRACKING MADE SIMPLE

Your business does a lot of tracking; in fact it depends on it. TIMS Bulk Gas Manager tracks and manages all of your bulk gas operations and deliveries, taking the guesswork out of your bulk gas processes.

Seamless Tracking

*TIMS Bulk Gas Manager is an integrated module for managing bulk gas tank installations, forecasting, ordering, scheduling, billing, and payment processing for all of your bulk gas operations. Create orders, forecast deliveries, and record quantities all within your TIMS system. Track argon, CO2, helium, hydrogen, nitrogen, oxygen and propane.

Easy Set-up

When you run Bulk Gas Manager, click to choose which gas type you want to manage. Run multiple 'gas managers' at the same time for various gases. Simply choose a bulk gas type, set up your configurations and UOM conversions specific to each gas, then use your dashboard to forecast future delivery requirements based on customers' tank readings. Once an installation is set up in TIMS, customer information like contact information and A/R is integrated and accessible in the Bulk Gas Manager Customer dashboard.

Telemetry Partners

Interfacing with various telemetry providers gives you accurate up-to-date tank readings. This telemetry data increases tank forecasting refill requirements, scheduling efficiencies, and more effective routing. TIMS interfaces with a variety of telemetry providers such as DataOnline, Wise Telemetry, KnowGas, and GasLog.

See deliveries, tanks, usage overrides, regulators, and readings.

Additional Features

- Create orders in mass for all bulk gas customers
- Customers can create bulk gas orders using ecommerce and pay their invoice on-line
- View historical usage rates and refill frequencies
- Auto suggest usage within a designated tolerance percentage
- Quick-create orders within Bulk Gas Manager, no re-keying; simple for will-call customers
- Summary and customer dashboards; export data and create reporting tools
- Budget billing/level pay
- Pre-purchase, price lock-in and contract for quantity agreements
- Delivery methods using will-call, scheduled, or automatic
- Delivery review to monitor efficiencies of past deliveries

Point of Delivery

Use TIMS Delivery to process bulk gas transactions at the point of delivery with built-in options that let you record the amount of gas delivered, calculate total charges, taxes, and delivery fees, capture electronic proof of delivery, process mobile credit card payments, and email or print the customer a copy of the entire transaction.

Contact Tracie Hunt, Tracie@CU.net or Tim Costin, TimC@CU.net or call 406-255-9550 for a personalized demo of TIMS Bulk Gas Manager.

*TIMS Bulk Gas Manager is an add-on module available in TIMS 7.
