

TIMS DELIVERY

A Top Mobile Solution with Bottom-Line Results.

Find the safety you need with TIMS Delivery. From touchless deliveries to curbside pickup, feel secure in the service and protection you provide. Drivers stay connected with real-time updates for total business management that moves with you.

Route:

Use TIMS Scheduler to maximize productivity and reduce operational costs, no matter where your business takes you.

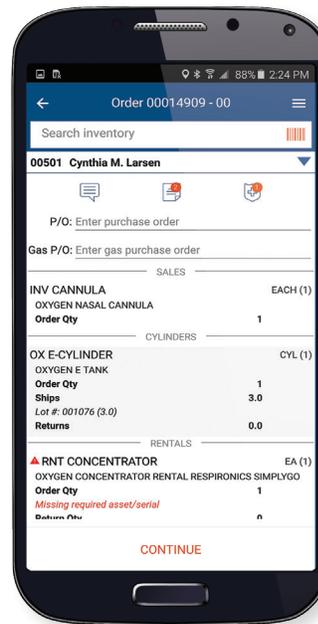

- | Create a delivery schedule and improve accountability by assigning break times and limits on resequencing of deliveries.

- | Avoid heavy traffic, reduce fuel costs, stay on course with turn-by-turn directions, and capture driver arrival and departure times.

- | Reduce maintenance and/or supply issues with truck inspection forms that can be set to be required at certain times.

Deliver:

Choose a delivery method with flexibility to update orders as needed.

- | Securely access patient information to verify address, delivery time, and note potential hazards at the delivery location (such as airborne, infectious, or bloodborne diseases).

- | Stay organized and on task with delivery prompts and checklists.

- | Check inventory and pricing, barcode scan, and recalculate costs.

- | Scan serial numbers and lot numbers.

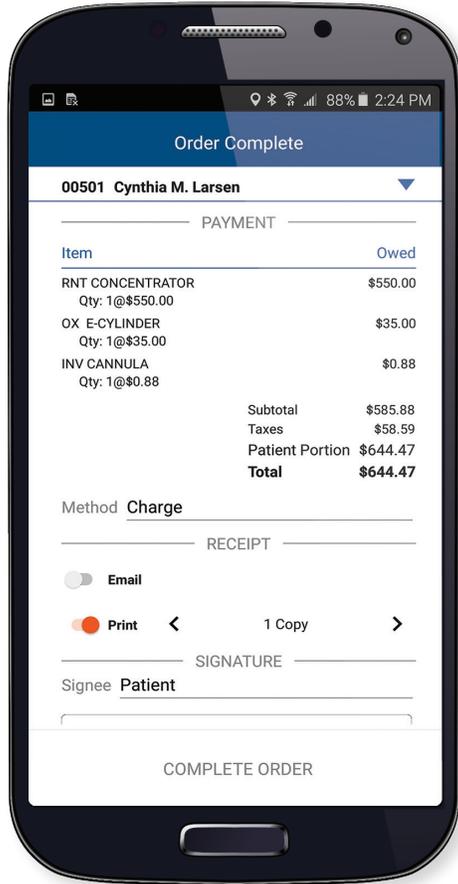

- | Capture patient signatures for proof of delivery.
- | Access, edit, and submit electronic forms and custom-designed form screens (like Home Risk Assessments or Plan of Care Checklists) and other documentation.
- | Send undeliverable/rescheduled orders to an internal team for review and customer follow up.
- | Flag an order for quality assurance (QA) review to assure every detail is correct prior to billing.
- | Automatically confirm orders for billing following delivery.

TIMS DELIVERY

A Top Mobile Solution with Bottom-Line Results.

Collect:

Finish orders by capturing a signature and providing a printed and/or emailed receipt.

- | Collect credit card payments at the time of service.
- | Email customer receipts or print immediately using a Bluetooth printer. A copy of the receipt is also uploaded to TIMS.
- | Reduce DSO as orders are updated immediately in TIMS.
- | Reduce back office paperwork by eliminating re-keying of orders and scanning of paper documents.
- | Avoid write-offs by reducing the chance of misplacing paperwork.

Security:

We take security seriously. Only users who have delivery authorization are granted access to log in to the app. We're also able to wipe all information from a device if it is lost or stolen.

We protect your customers' information by requiring a registration upon initial access of the app. In addition, to access the app, a user must log in with their username and password each day they use it. Finally, an application-level password can also be required to re-enter the app after the device sleeps or is turned off.

Harness the newest developments in technology with TIMS Delivery to increase efficiency, streamline your processes, and grow your business.
